Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-2, and 5-7 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification provides support for a cooling member contact an upper or lower die but fails to disclose 2 cooling members contacting an upper and a lower die. The claim as amendment now requires that two cooling members contact both the upper and lower dies.

If claim 1 and the "means plus function limitations of claim 5 were written in a narrative form, which is not, it would be correct to note that two cooling members contact an upper and lower dies. However, claims 1 and the "means plus function" limitations in claim 5 are active positive active steps, hence the phrase "two cooling members contact said upper and lower dies" is literally read as contact of each upper and lower dies by two cooling members.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP
